29 Die on State Highways During Month of July

Little Rock, Aug. 17 — (AP) — Twenty-nine persons were killed in traffic accidents in Arkansas last month, compared to 36 in July, 1948, state police Director Herman Lindsey reported today.

One hundred ninety others were injured last month. Of this year 197 persons were killed during the first seven months of this year 197 persons were killed in Arkansas traffic accidents; for the same period last year the total was 223.

Ark-La Gas Co. Seeks to Build Pipeline

An \$8,000,000 pipeline proposed by the Arkansas Louisiana Gas Company to transmit gas from the productive Washita, Tex., field to the rapidly growing central Arkansas region is the subject of Federal Power Commission hearings which started Monday, August 15, in Washington, D. C. Construction of the new 20-inch line, major project of the company's proposed \$13,000,000 construction program for 1949, will begin immediately following approval of the power commission, according to A. H. Weyland, president of Arkansas Louisiana Gas Company.

Starting at the Washita field, the proposed line will cross the Red River approximately 30 miles north of Shreveport, the Little Missouri River approximately seven miles northeast of Prescott, Ark., and the Ouachita River five miles south of Arkadelphia, Ark. The line will cross the river crossings at the 163 miles of pipe. The line will parallel the company's present system for about 90 miles between the Arkansas Louisiana Gas Company plant at Magnolia, Ark., and the Perla reducing station near Malvern, Ark. Final delivery point of the proposed line and northern junction of the company's main transmission system in Arkansas. From this point other lines already in service will carry the gas east to the Blue Bluff west of Hot Springs and north to Little Rock, all located in regions where demands for natural gas have been steadily increasing since the end of World War II. When completed the line will have a capacity in excess of 200,000,000 feet per day, roughly enough natural gas to furnish the peak winter needs for commercial and domestic purposes of three cities the size of Little Rock.

The proposed line will greatly increase the capacity of the company's present system, particularly benefiting the localities of Little Rock, Pine Bluff, Malvern, Hot Springs and Benton, all industrial and residential areas now experiencing rapid post-war expansion.

To expedite construction, contracts have been let to three separate concerns, each of which will work on particular portions of the line simultaneously to assure rapid completion. The section from Magnolia, Ark., to Malvern, Ark., including the multiple, 16-inch Little Missouri crossing will be built by the Later Construction Company, Houston, Tex. Anderson Brothers Construction Company also of Houston, will construct the line from Washita to Magnolia. The Red River and Ouachita River crossings, both multiple, 14-inch crossings to insure against service interruptions, will be constructed by the Omaha Dredge and Dock Company, Omaha, Neb.

The company's present transmission system ties into more than 25 gas fields in the Ark-La-Tex area and is connected to approximately 20 wells in the Washita field alone. New wells drilling in the present fields plus anticipated production resulting from current exploration will be tied into the new 20-inch line when completed.

The Washita-Malvern line is a portion of the company's proposed construction budget of over \$13,000,000 for 1949. The remainder of the budget will be spent for extension of both domestic and commercial service in communities now being served by the company, enlarging present gas distribution plants, drilling additional wells and installing or repairing gathering systems in the gas fields now supplying natural gas to the system.

Harvesting of Rice Makes Good Progress

Dallas, Aug. 17 — (AP) — Harvesting of rice made good progress in Louisiana and Texas this week as hot, dry weather favored growth of the new crop in the south belt. However, movement will not be large for another week or ten days, the U. S. department of agriculture's production and marketing administration reports.

Several lots of new crop rough rice moved to southwest markets this week. New crop zenith generally sold from \$9.50 to \$10.25 a barrel in Texas. Around Welch, Louisiana, two lots brought \$7.13 to \$7.21, while small lots moved at \$5.50 to \$6 a barrel, wet basis in the Guaydon area. Prices of new crop rice ranged around \$2 to \$3 lower than a year ago.

Milled rice markets showed little activity during the past week. Only small lots of new crop rice were offered, and buyers hesitated to accumulate stocks of old rice. Southern mills offered new crop zenith largely from \$9 to \$9.50 per 100 pounds. F. O. B., although some quotations reached to \$9 at Houston. Last year, new zenith was quoted around \$10.25 to \$12, F. O. B., southern mills.

At New Orleans, domestic inquiry was slow and export sales were limited to small quantities to Cuba. No. 1 old crop zenith brought around \$8.25 per 100 pounds and Texoro \$12. First new crop rice of the season arrived at New Orleans this week. New crop rice was quoted on a future delivery basis at a discount of about \$1 under old crop offerings.

DOROTHY DIX Training For Parenthood

Dear Miss Dix: What do you consider to be the qualifications of a real wife and homemaker? Should every girl take up domestic science and kindred training whether she intends to enter some profession or get married? What training should a young man have in preparation for the responsibility of marriage and fatherhood?

L. T. E.

Answer: I think that the best qualifications for marriage is being good sports. If a man and woman have the spirit of fair play and are willing to give and take; if they can do good team work; if they have the courage to fight on when luck seems to be against them; if they can be gallant losers and take life as it comes without whining, they will win out every time in the end.

I am strong for girls being trained in all the domestic arts and sciences because no matter how rich or poor, how highly placed or how humble, the two things she is sure to need at some time in her life are how to cook and sew. If she is wealthy, it enables her better to supervise her establishment and manage her servants; if she is middle class, it enables her to dress more cheaply and have better food. If she is poor, it gives her two trades whereby she can always support herself, for there are very few places in the world where there is not a continual need for good cooks and seamstresses.

Certainly no girl should dream of getting married and taking a man's stomach and pocketbook into her keeping until she has qualified as a domestic expert. Many girls, do, of course, and that is one reason that there are so many divorces, for many a young hus-

band's first disillusion with his bride has come with the knowledge that she couldn't even fry the bacon that he brought home, and that she was throwing most of his hard-earned dollars into the garbage can.

Few subjects have provided so many bitter and acrimonious disputes as the breakfast coffee. Enough tears have been shed over burnt toast to float a battleship, and many a happy and sunny-tempered young husband has been turned into a dyspeptic and bilious grouch by his wife's biscuits.

Nothing ties a man to his own fireside so tightly as does a good, heavy dinner that makes him as disinclined to go out and hunt for adventures as a gorged snake.

Of course it is just as much a man's duty to be a good husband and father as it is for a woman to be a good wife and mother, but just how you would go about training the man for the domestic career is not plain. He could be taught to keep on smiling, no matter whether the salt-shaker fell into the soup or not, and to make a pleasant rejoinder when his wife met him with the glad tidings that the coal was out and the roof had sprung a leak and little Johnny broke his pet pipe and Aunt Sally was coming for a nice long visit.

And he might be taught that you don't wash a baby as you do a setter pup, add that wife was just as tired as he was and that it was his turn to do the dishes. But, perhaps the most important advice that any husband-to-be could

be given would be an intensive course in bills, then a man wouldn't be surprised when he found out what it costs to support a family.

DOROTHY DIX

Dear Miss Dix: The girl I am engaged to has incipient T. B. and the doctor has ordered her to the West for a year. She hasn't the money to go, neither have I it to give to her. Another man has offered to pay all of her expenses. He wants to marry her. He doesn't ask her to love him. All he asks is that she be loyal. She has asked me to release her from her promise so she can marry this man in return for his saving her life. She thinks she can find contentment, but no happiness. Is there any way out for us?

UNDECIDED
Answer: I think the girl would make her sacrifice in vain if she married a man she didn't love in order to get the money to go West. One of the factors in the curing of any disease is peace of mind and certainly any woman would be in a most upset mental state if she were battling with a blighted love affair and trying to school her heart to forget one man and turn toward another because it was her duty.

Most doctors now do not put much stress on climate in T. B. cases. They say that any fairly good climate will do, provided the patient lives in the open air, keeps quiet and has nourishing food, and that it is better for those afflicted to be at home with

Republicans to Delay Aims Statement

Washington, Aug. 17 — (AP) — Republicans were reported in general agreement today to delay until next spring any statement of party aims for the 1950 congressional campaign.

Senator Taft of Ohio, chairman of the senate GOP policy committee, told a reporter that informal talks of leaders with Republican national chairman Guy G. Gabrielson.

Friends and family and be happy than it is for them to be in a better climate where they are homesick and lonely.

A woman who is heart whole may take a chance on marrying a man out of gratitude, for whom she has no affection, but the woman who is in love with some other man is bound to be desperately unhappy herself and make the man she marries miserable. It is always disastrous for all concerned.

DOROTHY DIX

HOT FLASHES?
Are you going thru the functional "middle-age" period peculiar to women (35-55 yrs.)? Does this make you suffer from hot flashes, feel so nervous, high-strung, tired? Then try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Pinkham's Compound has what doctors call a stomachic tonic effect.

son showed most sentiment against trying to draft any set of principles now.

However, Senator Wherry of Nebraska, the GOP floor leader, said in a separate interview he thinks the Republicans ought to make it clear where they stand on national issues well in advance of the campaign.

"The Republican party ought to come out with a platform advocating government economy and against the welfare state that President Truman is trying to promote," Wherry declared.

"We are never going to get anywhere pussy-footing on issues and the sooner we make it clear that we are going to fight vigorously against the socialization ideas of the man in the White House, the better off we'll be."

Wherry said he thinks the Republicans had better get busy in the midwest if they want to win next year's battle over control of congress.

Gabrielson, who met with a group last night to plan a Sioux City, Iowa, farm meeting September 21 and 22, said efforts will be stepped up to make this a major party occasion.

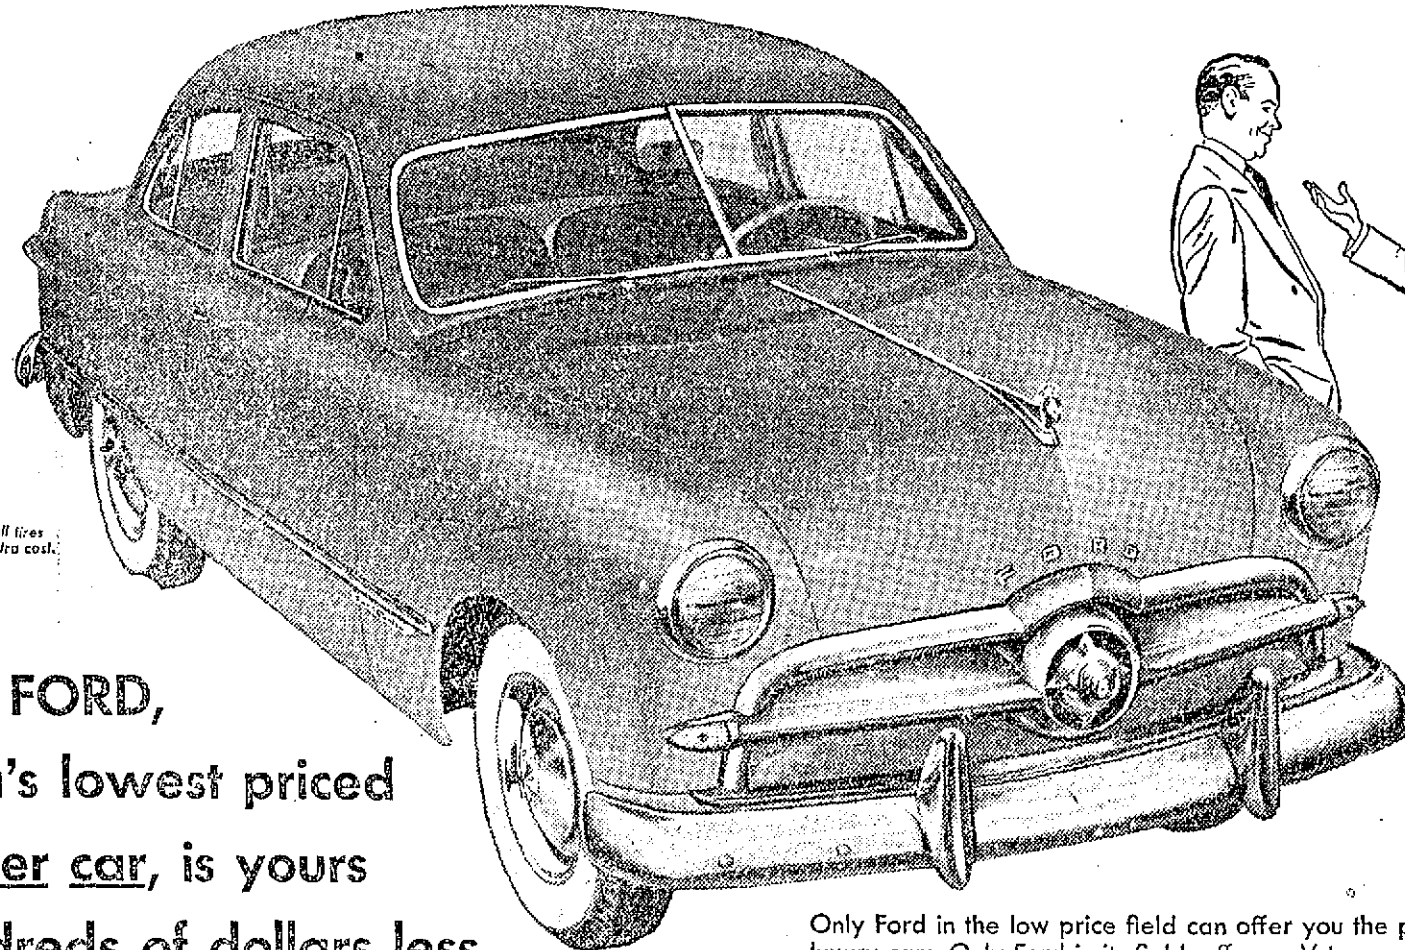

FAST RELIEF FOR ITCHING, STINGING OF HEAT RASH

Itching, burning heat rash got you frantic? Sprinkle on Mexsana—get quick, soothing relief! This wonderful help is due to Sorb-Shield Action which helps absorb irritating excess moisture and forms a shield on chafed skin against rubbing. It's the original prickly heat powder—Can't be beat for easing stinging torment of prickly heat, chafe and diaper rash.
